

Patient Mentor Program

Mentee Registration Form

Experiencing infertility can be stressful and frustrating. At The Reproductive Medicine Group (RMG), we recognize the emotional impact this time can have on a couple. For this reason, we have developed a Patient Mentoring Program. The program provides an opportunity for new patients to speak with someone who has been through similar experiences. Sharing information with someone who understands your situation offers insight into the realities of fertility treatment from a patient's perspective, both medically and emotionally. That is the role of our Patient Mentors - these volunteers are current and past patients of RMG who want to share their infertility experience and personal history with you. All are available to answer your questions by e-mail or phone.

If you are interested in participating in the program, please complete the following information and leave it with our front desk staff. We will then provide you with a list of Mentors to contact.
